

CSU & USDA Forest Service field tested

Only BEYOND, ground treatments, resulted in a significant increase in oleoresin yield (about 40% experiment-wide).

Infected Ponderosa pine, adult MPB and blue stain fungus

- "BEYOND saved my trees, over 400 Ponderosa Pines, Scotch Pine, Ash and Spruce trees. If wasn't for your products I would've lost all them. The pitch pitched the bugs out of the trees. I've been using BEYOND since 2017, I use nothing else." - John W. Cheyenne, WY
